

(Rio Grande Cutthroat Trout)

Watershed & Stream Monitoring

Data Summary Form

New Mexico Watershed Watch –NMDGF

Location

Name _____

GPS (if available) N _____ W _____

Recorder's

Name: _____

Date _____

Time Started _____ Finished _____

	Parameter	Device Calibrated? yes/no	Standard		My Results	Other Group's Results	Other Group's Results	Other Group's Results	Average Results	OK for Fish?	OK for Humans?
			High Quality Coldwater Fish (2001)	Human							
1	Streamflow	N/A	None *	None							N/A
2	Water Temp	Y N	< 20° C	None							N/A
3	TDS by conductivity meter (Please note if results are in mg/L or µs/cm)	Y N	None	500 ppm						N/A	
4	Turbidity	Y N	10 NTU	0.5 NTU							
5	pH	Y N	6.6 to 8.8								
6	Nitrate {NO ₃ }	Y N	None	10 mg/l						N/A	
7	Dissolved Oxygen	Y N	6.0 mg/l	None							N/A
8	Total Phosphorus {P} {PO ₄ ³⁻ }	Y N	0.1 mg/l	None							N/A
Notes:											

PLEASE COMPLETE WEATHER INFORMATION ON EACH TRIP:

	Precipitation Information	Current	Past 48 hours (circle)	Air Temp
10	Rain light	Yes No	Yes No Don't know	
11	Rain showers	Yes No	Yes No Don't know	
12	Rain heavy (thunder/lightning)	Yes No	Yes No Don't know	
13	Snow	Yes No	Yes No Don't know	
14	Fair-no rain	Yes No	Yes No Don't know	current

* Although there is no streamflow standard for fish, fish need some water to survive. > 2 cfs is optimal, <0.5 cfs is poor.
Show all units of measurement.
